📄 GST Compliant

👥 Multi-Tenant

📊 Real-time Reports

Authentication & Login

Multi-role secure login system with separate portals for businesses and tech support

● Business Login

- › Business Code + Email + Password login
- › Separate cloud URL: erp.naewtgroup.com
- › JWT-based session (localStorage)
- › Plan expiry checks on login
- › Grace period banners (trial / admin / readonly)
- › Login activity & GPS location tracking
- › Auto-creates 6 default units on registration
- › Auto-creates 5 GST rates on registration

● Tech Support Login

- › Separate portal: erpa.naewtgroup.com
- › Email + Password only (no business code)
- › WebAuthn fingerprint quick login
- › Admin profile image upload
- › Plain password view in tech panel
- › Multiple tech support accounts
- › Full super-admin privileges

● Login Screen Support Chat

- › Help/? button — visible BEFORE login
- › Anonymous chat (no account needed)
- › Name, Phone, Email fields (first time)
- › Session ID in localStorage (conversation persists)
- › File attachment — Cloudinary CDN storage
- › Draggable + resizable chat widget
- › Mouse & touch support (mobile friendly)
- › Unread reply notification badge

● Registration

- › Self-registration — new business onboarding
- › Auto-generated unique Business Code
- › Optional Referral Code field
- › GSTIN, PAN, address at registration
- › Financial year start configuration
- › Instant access after registration

Dashboard

Real-time business overview at a glance

● Summary Cards

- › Sales total — Today / This Month / Last Month / This Year
- › Purchases total — same 4 periods
- › Outstanding Receivables (total due from customers)
- › Outstanding Payables (total due to suppliers)
- › Net GST Payable (Output – ITC)

● Charts & Analytics

- › 12-month Sales & Purchases bar chart
- › Top 5 Customers by Revenue
- › Period selector (month/year filter)
- › Real-time data — no manual refresh needed
- › Responsive charts (mobile optimised)

Sales Module

Full GST-compliant invoicing with auto calculations

● Sales Invoices (SI-XXXX)

- › Auto serial numbering (SI-0001, SI-0002...)
- › Manual serial number mode — enter freely
- › Custom prefix per business (e.g. INV, BILL)
- › Doc start number configurable
- › Duplicate doc number warning + dropdown
- › Tick-select items — checkbox to include/exclude
- › Multiple items per invoice
- › HSN/SAC code per item

● GST Calculations

- › Discount applied BEFORE GST
- › Intra-state: CGST + SGST split
- › Inter-state: IGST applied
- › GST-Inclusive Rate Toggle — "GST Inc." checkbox
- › Auto back-calculate base rate from inclusive price
- › Multiple tax rates per invoice (0%, 5%, 12%, 18%, 28%)
- › Tax summary table at invoice bottom
- › Full GST details — ready to fill & upload

● Invoice Options

- › Transport charges after tax
- › Optional shipping address
- › Party GSTIN & state auto-fill
- › Place of supply selection
- › Notes / narration field
- › Print-ready invoice layout
- › PDF download of invoice
- › Deleted docs Bin — restore or permanent delete

● Credit Notes (CN-XXXX)

- › Link to original sales invoice
- › Partial or full credit
- › GST reversal auto-calculated
- › Affects outstanding balance
- › Appears in GSTR-1 returns

Purchase Module

Track all purchases and supplier bills with full GST ITC

● Purchase Bills (PB-XXXX)

- › Supplier bill entry with GST breakup
- › Input Tax Credit (ITC) auto-tracked
- › HSN/SAC code per item
- › Same GST-inclusive toggle as sales
- › Bill status: Unpaid / Partial / Paid
- › Custom prefix per business

● Debit Notes (DN-XXXX)

- › Supplier return / purchase correction
- › Link to original purchase bill
- › GST reversal on ITC
- › Affects supplier outstanding balance
- › Appears in GSTR-3B as ITC reversal

Payments Module

Bill-wise receipt and payment tracking with auto voucher status updates

● Receipts (REC-XXXX)

- › Collect payment from customers
- › Bill-wise allocation — link to specific invoices
- › On-account payment (unallocated)
- › Partial payment support
- › Auto-updates invoice status (Partial / Paid)
- › Multiple invoices in one receipt
- › Cash / Bank / UPI mode
- › Receipt number auto-generated

● Payments (PAY-XXXX)

- › Pay suppliers against purchase bills
- › Bill-wise or on-account
- › Partial payment tracking
- › Auto-updates bill status (Partial / Paid)
- › Payment number auto-generated
- › Edit & delete support

● Outstanding Management

- › Outstanding Receivables — all unpaid customer invoices
- › Outstanding Payables — all unpaid supplier bills
- › Filter by party, date range
- › Ageing analysis (overdue days)
- › One-click receive/pay from outstanding list
- › Bill-wise toggle in Party Statement

● Cash & Bank Module

- › Multiple accounts — Cash in Hand, Petty Cash, SBI, HDFC etc.
- › Cash Book report — daily in/out with running balance
- › Bank Statement — per account transactions
- › Contra entry — cash ↔ bank transfer
- › Expense vouchers — rent, electricity, salary
- › Expense heads master (CRUD)
- › Auto balance update on every transaction

Masters

All master data with Edit + Delete on every record

● Parties

- › Customer / Supplier / Both type
- › GSTIN validation
- › State code auto-fill
- › Opening balance (Dr/Cr)
- › Search, filter, paginate
- › Edit + Delete supported

● Items

- › Goods / Service type
- › HSN/SAC code link
- › Default tax rate
- › Sale & purchase price
- › Opening stock
- › Item image upload (Supabase)
- › Barcode auto-generate on save

● Other Masters

- › Units — inline row editing
- › HSN/SAC codes — inline editing
- › GST tax rates — inline editing
- › 6 default units auto-created
- › 5 default GST rates auto-created
- › States list — all Indian states

Accounting & Reports

Complete double-entry accounting with GST compliance reports

● Party Ledger

- › All Dr/Cr entries per party
- › Running balance column
- › Date range filter
- › Sales, purchase, receipts, payments — all in one
- › Opening balance included
- › Print / export ledger

● Trial Balance

- › Standard format — all ledger heads
- › Debtors / Creditors group
- › Sales / Purchase accounts
- › Bank / Cash balances
- › GST liability / ITC accounts
- › Debit = Credit auto-verified

● GSTR-1

- › B2B invoices breakup (with GSTIN)
- › B2C summary (without GSTIN)
- › Month + Year filter
- › JSON export — ready to upload on GST portal
- › HSN-wise summary
- › IGST / CGST / SGST split

● GSTR-3B

- › Output GST (from sales)
- › Input Tax Credit — ITC from purchases
- › Net GST payable calculation
- › Month + Year filter
- › Ready-to-fill format
- › Matches GSTR-1 output values

Inventory

Real-time stock tracking with alerts

● Stock Management

- › Real-time stock levels (opening + purchased – sold)
- › Average rate calculation
- › Stock value (qty × avg rate)
- › Low stock alerts (configurable threshold)
- › Item-wise stock report
- › Category-wise filtering

● Barcode System

- › Barcode auto-generated on item save
- › Scanner support — scan to add item in invoice
- › Single barcode label print
- › Bulk barcode label print (quantity per item)
- › Custom label designer — drag & drop
- › Templates with logo + fields

Business Settings

Full control over business profile, users, permissions and invoice configuration

● Business Profile

- › Business name, GSTIN, PAN
- › Full address with state
- › Financial year start month
- › Business logo upload
- › Contact email & phone
- › Industry type selection

● Invoice Configuration

- › Custom prefix per voucher type (SI, CN, PB, DN)
- › Serial number mode — Auto or Manual per business
- › Doc start number (series begins from X)
- › Print template customisation
- › Footer text on invoices

● Users & Permissions

- › Multiple users per business
- › Roles: Business Admin / Staff
- › Module-wise permission toggle per staff
- › Staff can be restricted to specific modules only
- › Password reset by admin
- › Max users as per plan

● Data Backup & Restore

- › Download JSON backup — all data in one file
- › Includes: parties, items, vouchers, payments
- › One-click download anytime
- › Restore from backup — re-import data
- › Cloud: Supabase PostgreSQL
- › Desktop: SQLite auto-backup (last 7 copies)
- › ZIP with PIN password — secure backup
- › Restore before login on desktop version

Tech Support Panel (Super Admin)

Full platform management — businesses, plans, users, branding and analytics

● Dashboard

- › Total businesses on platform
- › Trial count vs paid count
- › Total users across all businesses
- › New businesses this month
- › Plan-wise breakdown chart
- › Login activity log with GPS

● Business Management

- › List all businesses — search, filter, paginate
- › Assign subscription plan
- › Set plan expiry date manually
- › Mark as trial / active / blocked
- › Per-business JSON backup download
- › View all users of any business
- › Activation codes tab per business
- › Activation log tab — full history

● Plans Management

- › Full CRUD — Create / Edit / Delete plans
- › Plan name, price, billing cycle
- › Validity days, trial days
- › Max users per plan
- › Features list per plan
- › Sort order & active toggle

● App Settings & Support

- › Software name (white-label)
- › Support email & phone
- › Logo URL configuration
- › Primary colour (branding)
- › Footer text on all pages
- › Support Messages inbox (chat with login-screen users)

- ›
- › License voucher group (visible to buyer or not)

- ›
- › Reply to user chat — in-app messaging
- › Backup All — download all businesses' data as single ZIP

Cloud Version

Fully hosted SaaS — access from anywhere, any device

● Deployment

- › Frontend: Vercel (global CDN)
- › Backend API: Express on Vercel serverless
- › Database: Supabase PostgreSQL
- › File storage: Cloudinary (25 GB free)
- › FIFO auto-cleanup at 20 GB storage
- › File max size: 10 MB per upload
- › Always-on, zero maintenance for user

● Multi-Tenant Architecture

- › Each business fully isolated
- › Shared database with row-level isolation
- › Business code ensures data separation
- › Scalable to thousands of businesses
- › Zero cross-business data leak risk

● Access & Security

- › Login from any browser, any OS
- › HTTPS enforced (Vercel TLS)
- › JWT authentication — 7-day sessions
- › CORS restricted to known domains
- › Role-based API middleware
- › Session invalidation on logout

● DB Connection Modes

- › Cloud mode: Supabase PostgreSQL
- › DB mode indicator in Business Settings
- › Cloud/local toggle in localStorage (dev)
- › Automatic failover handling

Desktop LAN Version

Offline-first Windows EXE — one PC as server, others connect via browser on LAN

● Installation

- › Windows .EXE installer — single click
- › Node.js + PostgreSQL bundled
- › Auto GitHub Actions build on every version tag
- › Published to GitHub Releases automatically
- › Electron-based desktop app wrapper
- › Version auto-bump on every release

● LAN Networking

- › Server PC runs Node.js + local PostgreSQL
- › Clients connect via browser — no install needed
- › `http://bizcor.local` hostname — mDNS auto-resolve
- › QR code — scan from phone to connect
- › Windows Firewall auto-configured on install
- › Same WiFi — all devices share live data

● Offline Database

- › SQLite local database (no internet needed)
- › `SQLITE_PATH` env var for desktop mode
- › All data stays on-premises
- › No cloud dependency for daily operations
- › Internet only for activation & backup sync

● LAN Internal Chat

- › Staff-to-staff messaging over LAN
- › No internet required
- › Text + file + image sharing
- › WebSocket real-time (server PC hosts)
- › Draggable chat window
- › File download with thumbnail previews
- › Admin clear-chat button
- › Upload cancel (AbortController)

Licensing & Activation System

Two-key offline licensing with zero piracy design

● Two-Key System

- › Installer Key — bundled in EXE TXT file
- › Online validation on install (net required once)
- › Binds: email, phone, MAC, CPU ID, Windows version, IP
- › Plan Key — generated in Tech Panel for paid plans
- › Activation via phone QR scan (PC needs no internet)
- › Hardware-bound activation code via email

● Anti-Piracy

- › No install possible without internet (Installer Key)
- › Plan Key: single-use + hardware-bound
- › Free Key also requires online activation
- › No heartbeat needed — net only at install + activate
- › Voucher code reuse — old PC auto-blocked
- › Reuse log visible in Tech Panel

● Tech Panel Activation

- › Activation Codes tab per business
- › Activation Log tab — full history
- › Date/time, email, phone, fingerprint, IP logged
- › Manual block suspicious activations
- › 30-day trial timer
- › Plan expiry management

● Market Analytics

- › Conversion rate (installs vs activations)
- › Region-wise installation map
- › Free vs Paid ratio
- › Average install-to-purchase gap
- › Gap analysis: 2d / 30d / 60d / 90d+

Referral System

Built-in referral tracking with auto-reward

● Business Side

- › Unique referral code per business (auto on registration)
- › Optional referral code field at registration
- › Progress bar — 0/5 referred count
- › Reward status display
- › Auto "Referral Plan" on 5 successful referrals

● Tech Panel

- › "Referrals" column in Businesses list
- › "Referred by: Name/Code" per business
- › Referral Analytics page — top referrers
- › Monthly referral count charts
- › Reward assignment tracking

Offline-First & Sync Architecture

IndexedDB-based offline mode with background sync — work without internet

● Phase 1 — Local Storage

- › IndexedDB setup — parties, items, vouchers locally stored
- › Offline Drafts — create invoices without internet
- › /offline-drafts page — view and manage pending drafts
- › Sync pending / conflict status per record

● Phase 2-3 — Sync

- › Reads from local, writes to sync queue
- › Background sync — auto push on internet restore
- › Temporary UUID offline → real doc number from server
- › Sync status indicator per record

● Multi-Device Sync

- › 3 PCs on LAN — real-time WebSocket sync
- › Conflict resolution UI (newer timestamp wins)
- › Cloud version: Supabase Realtime
- › LAN version: local WebSocket server

● Desktop Backup & Restore

- › Full SQLite DB ZIP backup — date-time stamped
- › ZIP password = user PIN (no one else can open)
- › Auto backup daily (silent, 7 copies retained)
- › Manual backup — one click anytime
- › Restore from login screen (before login)
- › Restore on any PC — full data recovery

Feature Summary at a Glance

Quick reference — module count and key numbers

Module	Key Features	Count
☐ Authentication	Business login, Tech login, Fingerprint, Support chat, Registration	5 flows
☐ Dashboard	4-period summary, 12-month chart, Top customers, Outstanding	10+ widgets
☐ Sales	Invoices, Credit Notes, GST-inclusive toggle, Serial modes	2 voucher types
☐ Purchases	Bills, Debit Notes, ITC tracking	2 voucher types
☐ Payments	Receipts, Payments, Bill-wise, Outstanding	2 voucher types
☐ Cash & Bank	Multiple accounts, Contra, Expenses, Cash book, Bank statement	6 sub-modules
☐ Accounting	Party ledger, Trial balance, Receivables, Payables	4 reports
☐☐ GST	GSTR-1 (B2B+B2C), GSTR-3B, JSON export, Ready to upload	2 returns
☐ Inventory	Real-time stock, Avg rate, Low stock alert, Barcode	4 features
☐ Masters	Parties, Items, Units, HSN, Tax rates	5 masters
⚙ Settings	Profile, Invoice config, Users, Permissions, Backup	5 sections
☐ Tech Panel	Businesses, Plans, Users, App settings, Support chat, Backup	7 sections
☐ Desktop LAN	EXE installer, LAN server, QR connect, Internal chat, Offline DB	5 features
☐ Licensing	Two-key system, Hardware bind, Anti-piracy, Analytics	4 components
☐ Referral	Unique codes, Auto-reward, Analytics, Tech panel tracking	4 features
